Plant a tree

£2.50

Saving the planet is no trivial affair, and like all the best inventions trees offer a fantastically simple solution to many of life's greatest challenges.

These hand planted trees help restore biodiversity, rebalance ecological and atmospheric conditions and even contribute towards cooling our planet. They're great to climb, especially if you're a forest weevil, and in their spare time they like nothing more than photosynthetically sequestering atmospheric carbon, one molecule at a time. A worthy endeavour.
